

PLATINUM TOOLS®

Terminal Crimp Tool

The **Terminal Crimp Tool** is designed and manufactured to provide superior performance, durability and value. It features dual crimping cavities for insulated and non-insulated terminals and splices. The thin tapered nose assists when working in confined areas.

Application

- Crimp non-insulated terminals and splices from 10-22 AWG
- Crimp insulated terminals and splices from 10-22 AWG
- Precision ground and hardened cutting blade
- Drop forged from chrome vanadium steel alloy to prevent rust
- Comfort grip dipped handles
- Cuts copper and aluminum wire up to 10 AWG (not suitable for cutting steel)

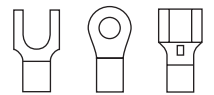

Marking/Packaging

- Individually boxed or retail clamshell
